## 2. PROGRAM OVERVIEW

The Research and Innovation Grant (RIG) is designed to facilitate the advancement of novel research by supporting internal collaborative research projects that align with the KU Research Strategy (see Fig. 1 next page) and corresponding College research priorities. In addition, the program aims to promote the formation of effective collaboration, attract external sponsorship and raise the visibility and reputation of KU.

Research projects are expected to align with, **at minimum, one of KU's nine research areas** shown in Fig. 1. The research activity supported under this program is expected to lead to advances in both knowledge and, where relevant, practical application in the corresponding research track(s). Accordingly, proposals of an interdisciplinary nature are strongly encouraged.

Proposals are expected to result in demonstrable outputs, including collaborative publications, graduate student training and development of intellectual property, particularly in the form of patents.

*Figure 1: Representation of KU's Research Priorities as per KU's Strategy. Each of the nine research priority areas depicted here, correspond with nine research tracks.*

| Managed Energy Transition                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                          | Sustainable Secure Society                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                            | Healthy Longevity                                                                                                                                                                                                                                                                                               |

\* For operating expenses (OPEX) only. **Capital equipment (CAPEX) purchases are NOT PERMITTED.**

### 3. FACULTY ELIGIBILITY

Subject to existing effort commitments on active grants from both internal and external funding sources (**not exceeding sum of 40%**), the following eligibility conditions apply (as per table below).

Note, with respect to existing effort commitments, the Department Chair has the authority to reallocate up to 10% from teaching or service to research, in addition to the existing research allocation of 40%, resulting in a total allocation of 50%, without the need for prior approvals. Any movement exceeding 10% necessitates approval from the Dean.

| Current <b>Co-I</b> on any active internal funding award: Eligible to apply as PI or Co-I. |                                  |

Faculty meeting the eligibility criteria above may act as PI on one (1) proposal and Co-I on one (1) other proposal under this call. Eligible faculty not applying as PI to this call may be involved as Co-I on up to two (2) proposal submissions.

Every PI and Co-I must be appointed as **full-time faculty** at KU, holding a **professorial faculty rank** of Assistant Professor or above at the time of Expression of Interest (EOI) submission. Faculty engaged on the RIG project must be either PI or Co-I in the proposal. **There is no other role possible for KU faculty.**

**The eligibility of faculty named on RIG project teams is validated and fixed at EOI submission stage.** The research team cannot be amended for the full proposal submission, with the exception of KU contract non-renewals/resignations of Co-Investigators between EOI and Full Proposal stage. If the Principal Investigator resigns from KU during the funding call process, the proposal will be withdrawn from consideration entirely.

## 4. PROJECT TEAM COMPOSITION

**4.1. Faculty Project Investigators** (*must be listed as Key Personnel in Fibi*): Must include one (1) designated Principal Investigator (PI) **and** at least one (1) designated Co-Investigator (Co-I). Projects can have **no more than three** KU faculty Co-Investigators.

Any KU faculty member involved in a RIG proposal must have a clearly defined role as either Principal Investigator (PI) or Co-Investigator (Co-I).

The PI and Co-I(s) must specify respective contributions (% effort) in accordance with anticipated time to be spent on the project, according to project activities **(typically in the range of 8.3% up to max. 15%)**. **The PI and Co-Is are strongly advised to check and take their existing commitments into consideration, when calculating their available capacity for the project.** Note the cost of faculty time will not form part of the Total Requested Budget (in-kind only).

**4.2. Project Personnel:** Research staff, engineers, technicians, graduate students.

**4.3. External Entities** (*must be listed as Key Personnel in Fibi*): Strategic non-KU participants may be affiliated with the project subject to demonstrable added value of their involvement. However, they cannot be assigned the role of PI or Co-I for submission eligibility purposes (see External Entities section 5.4.).

**4.4. KU Graduate Student Allocation:** Each faculty member involved in the grant can be allocated one postgraduate student as part of the project. The work plan should take these students into account. The cost of these students will not form part of the Total Requested Budget (in-kind only).

## 5. KEY CALL TERMS

### 5.1. Awardee

The Awardee under the RIG program shall be the named RIG Principal Investigator (PI). The awardee is responsible for overseeing the project management, including the research delivery, team & financial management as well as meeting the award reporting requirements.

If the project awardee leaves KU, the award cannot be moved with the PI. In such cases and where appropriate a replacement PI will be nominated by the Associate Provost Research, following discussions with the outgoing PI and the remaining faculty team member(s).

### 5.2. Award Term

Duration of award shall be for 36 months (split across 4 KU fiscal periods) from 1<sup>st</sup> October 2024 to 30<sup>th</sup> September 2027, subject to review and acceptance of annual progress reports.

### 5.3. Budget Allocation

Project budgets can be comprised of non-capital expenditures only, including the following eligible budget categories: *Personnel, Personnel Benefits, Travel, Operational Expenses, Technical Consulting, Subcontracts, and Other Direct Costs*.

Budget terminology per FIBI budgeting:

- **Requested Budget:** The sum of AED costs that will be borne directly by the project budget in a fiscal period, also known as 'Direct Cost'.
- **Total Requested Budget:** The total sum of costs expected to be borne directly by the project for its entire duration.
- **In-Kind:** In-kind is the contribution of goods or services other than money. For KU budgeting purposes, in-kind shall be any cost that contributes to the delivery of the project but not charged to the project such as faculty time, graduate students and internal overhead. The value of such in-kind contributions is captured as applicable in the budget and narrative to comprehensively demonstrate the resources dedicated to the project.
- **Total Cost:** The sum of Requested Budget and any applicable In-Kind contribution(s).

The **Total Requested Budget** per project may not exceed **AED2,945,000** for 36 months, allocated as follows per KU fiscal period:

| No. | Fiscal Period | Dates                                      | No. of Months | Max. Budget    |
|-----|---------------|--------------------------------------------|---------------|----------------|
| 1   | 2024          | 1 <sup>st</sup> Oct – 31 <sup>st</sup> Dec | 3             | AED [REDACTED] |
| 2   | 2025          | 1 <sup>st</sup> Jan – 31 <sup>st</sup> Dec | 12            | AED [REDACTED] |
| 3   | 2026          | 1 <sup>st</sup> Jan – 31 <sup>st</sup> Dec | 12            | AED [REDACTED] |
| 4   | 2027          | 1 <sup>st</sup> Jan – 30 <sup>th</sup> Sep | 9             | AED [REDACTED] |

\* Note the first period of the project (1<sup>st</sup> Oct 2024 – 31<sup>st</sup> Dec 2024), will correspond with the project ramp-up period. The total requested budget within period 1 will only permit project Personnel and Personnel Benefits costs. No other cost categories are permitted to be budgeted in period 1. Alternatively, the personnel budget for period 1 may be allocated as personnel budget at the end of period 4 from 1<sup>st</sup> October 2027 – 31<sup>st</sup> December 2027.

There will be no carryover of funds between fiscal periods. Spending profiles per project will be closely monitored and awarded funds will be reduced if under-utilized.

#### 5.4. External Entities

External entities involved in the project must provide expertise or access to facilities critical for the delivery of the proposed activity. They may not be assigned the role of Principal nor Co-Investigator for submission eligibility purposes.

- **External Collaborator (Universities; Research Institutes)** – Involved in the delivery of project activities to be undertaken at their primary research organization. If required, funds can be assigned for their involvement in the form of a sub-award with their Institution. Letter of Commitment (required template embedded within the RIG Full Proposal Template) is required at the full proposal submission stage. See Letter of Commitment section below for further information.

It is expected that External Collaborators should be either employed full time at a **Top 200 University as per [QS World University Rankings](#) and/or have a high H-Index (H=50+) per [Scopus](#).**

The emphasis on collaborations with top ranking universities and faculty is to ensure KU's research investment has the highest possible impact leading to highly cited publications. Projects will, as part of their reporting, be assessed on both their technical progress as well as their scientific impact.

- **Research Visitors (Formerly Visiting Scholar)** – Non KU faculty or project personnel (including students) hosted at KU for a short period of time to complete defined projects task(s). The role of research visitors must be clearly defined in the proposal with clear deliverables. They will each be issued with a Research Visitor contract. Guidelines for Research Visitors can be found [here](#), or in the [Research Visitor Request Form \(RVR\)](#) on the KU Portal. Planned Research Visitors should be specifically named within the proposal, otherwise RVRs raised during the project period are likely to be delayed or denied.
- **Technical Services** – Specialist facility providing technical output for a fee, typically fabrication, analysis, data etc. Service should not be available within KU. Resource justification should explain clearly what gap area the service fills. Involvement of external labs or facilities on a fee-for-service basis are not considered External Collaborations.

External Entities may participate at their own expense, seek partial funding from the RIG budget (in line with the above categories) or, make a direct contribution to the project without receiving any funds in return. External Entities making an in-kind and/or financial contribution but not receiving any financial assistance from KU, will be recognized as either unfunded External Collaborators or as a Co-Sponsor, depending on the type of contribution.

- **Intellectual Property**

The following IP terms will apply when external partners are engaged:

- Foreground IP generated solely by Khalifa University shall be owned by Khalifa University;
- IP generated solely by the Partner shall be owned by the Partner;
- Foreground IP generated jointly by Khalifa University and the Partner will be jointly owned by both Parties, with Khalifa University taking the lead in Intellectual Property protection and commercialization actions.

**Acceptance of these terms is mandatory for funded External Collaborators.**

- **Letters of Commitment (LOC) - (leading to Sub-Awards for FUNDED External Collaborators**

External Collaborators proposed to receive financial assistance from KU will subsequently be issued with a sub-award, and must adhere to the following requirements:

- o Be well-integrated into the proposal providing access to essential scientific expertise/facilities;
- o Receive no more than 30% of the award per fiscal period.
- o Make an in-kind or cash contribution of 25% of the sub-award value (*unless contribution is exceptionally waived by the Associate Provost Research*).
  - For example: if a collaborator requests AED100,000 from KU they must in addition commit AED25,000, therefore the total value of their activity is AED125,000;
- o Submit a **duly signed (by an authorized representative; generally this is not the collaborating PI faculty member) External Collaborator Institutional 'Letter of Commitment'** (in template provided in the RIG Full Proposal Template), with KU PI's full proposal submission.

- **Letters of Support (LOS)**

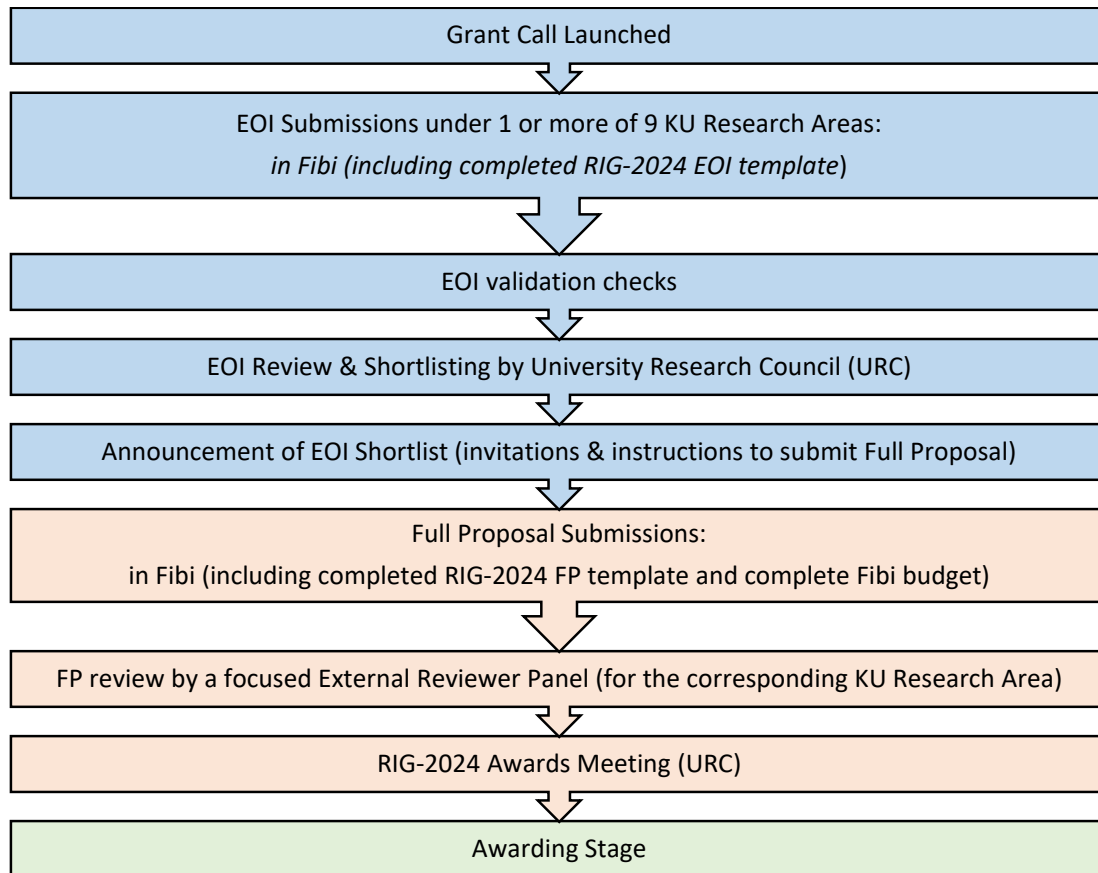

External entities providing cash/in-kind contribution, but not receiving financial resource from the KU budget, are *not required to submit a Letter of Commitment*. However, it is allowable to include letter(s) of support outlining external contributions committed in the proposal. It is also permissible to collect LOS from government or industry entities, to demonstrate significant interest in the research project and/or underscore the potential for follow-on funding or licensing opportunities. There is no required template for LOS; it may be simply prepared on the organization's letterhead.

### **5.5. Research Ethics and Safety**

Proposed RIG activities with research ethics and safety implications (e.g. use of human subjects; animal subjects; collection of personal data; carcinogenic, radioactive, or hazardous materials) require institutional approval prior to any such activities commencing. Actual or potential conflicts of interest, including financial conflicts of interest, must be disclosed and managed in accordance with institutional policies and procedures prior to the Award commencement. PIs are strongly encouraged to upload valid ethics approvals already received as applicable for proposed work **at Full Proposal stage** submission, but this is not a compulsory component.

## 6. APPLICATION PROCESS & REQUIREMENTS

The RIG-2024 grant call will follow a two-stage submission process: the Expression of Interest (EOI) Stage, followed by the Full Proposal (FP) Stage, as outlined below.

EOIs and Full Proposals are to be submitted only via FIBI: <https://rms.ku.ac.ae/fibi>, via the RIG 2024 Grant Call.

**FIBI is accessible both on and off KU campus network without the need for a VPN.** You are encouraged not to leave your submission to the last minute. The FIBI system will automatically close the Grant Call at the deadline. Any proposals still in draft ('In Progress') status past the deadline will be considered ineligible and deactivated in the system without further consultation.

### 6.1. EOI Submission & Review:

EOI applications must be submitted via Fibi under the RIG-2024 grant call, by the specified deadline. EOI applications must include the following items.

- The EOI application **must state the primary KU Research Area** (1 of 9 as per Fig. 1), under which the proposal is being submitted. This should be stated in the EOI Template attachment, and selected as the #1 rank research area in the Fibi record. If there are any additional cross-cutting research areas, these should be specified in Fibi with associated rank order.
- Complete all mandatory fields in Fibi, including the questionnaire.
- Do not create a budget for the EOI stage.

- Attach completed RIG-2024 EOI Template (word document, **page limit 1 x A3 page, do not alter the template formatting**).
- Name the file as: *RIG-2024\_PILastName\_EOI.doc*

EOI submissions will be strictly validated by USR to check that each required component of the submission has been provided in accordance with the CfP. EOIs not meeting all eligibility criteria, will be disqualified.

**EOI's complying with the validation checks will be reviewed by the University Research Council (URC).**

USR will inform shortlisted proposal PI's of their unique application reference number and provide the corresponding materials: RIG-2024 Full Proposal Template and RIG-2024 Proposal Review Criteria.

## **6.2. Full Proposal Submission & Review:**

This stage will only be open to shortlisted EOIs.

FP applications must be submitted via Fibi under the RIG-2024 grant call, by the specified deadline. FP applications must include the following items.

- FP applications **must be submitted under the same primary KU Research Area as the EOI.** This should be stated in the FP Template attachment, and selected as the #1 rank research area in the Fibi record. If there are any additional cross-cutting research areas, these should be specified in Fibi with associated rank order.
- Complete all mandatory fields in Fibi, including the questionnaire.
- The proposal budget must be created for the FP, as per the CfP budget parameters and KU guidelines. Refer to the following 'Development of Full Proposal Budget' table.
- Attach completed RIG-2024 FP Template (word document, do not alter the template formatting, all necessary graphs, figures and tables must be included in the specific page limits and not added as appendices. Supplemental documentation or additional unspecified content not requested or allowable as part of the call guidance will be removed).
- Name the file as: *RIG-2024\_PILastName\_FP.doc*

FP submissions will be strictly validated by USR to check that each required component of the submission has been provided in accordance with the CfP. FPs not meeting all eligibility criteria, will be disqualified.

**FP's complying with validation checks will undergo review.** Focused external review panels will be established to assess the FP submissions to the respective KU Research Areas. Each review panel will comprise external reviewers whose combined expertise will provide comprehensive expertise under the corresponding KU Research Area. Each panel member will review, score and provide feedback (according to RIG-2024 Proposal Review Criteria) for each proposal, submitted in their corresponding Research Area Panel. Panel feedback will be checked for consistency, validity and clarifications. Awarding decisions will be made by URC in the RIG Awards Meeting, whilst taking into account the subject matter expert Panel feedback and recommendations, as well as further considerations such as faculty profiles, research outputs on previous awards, and considerations as per KU Strategy and College Priorities.

- **Development of Full Proposal Budget**

When developing a budget please take into consideration the full array of project activities to be undertaken. The budget should be consistent with identified and committed sources of funding,

internal and/or external. The following are items that should be considered when developing the proposed budget:

| <b>Cost Type</b>                                                                                 | <b>Funding Cap Limits for RIG projects &amp; Applicable KU Policies</b>                                                                                                              | <b>Direct Cost or In-Kind</b> | <b>Budget Category</b>                                               |
|--------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------|----------------------------------------------------------------------|
| Faculty effort (PI; Co-Is)                                                                       | Min. 8.5% to Max. 15% each                                                                                                                                                           | 100% In-Kind                  | Personnel                                                            |
| Research staff salaries                                                                          | Fixed to 100%<br>(Rates pre-set in Fibi Budget)<br><b>NOTE: For FY24/Period 1:</b><br><i>Only research staff can be budgeted in this period (no other cost categories permitted)</i> | Direct cost                   | Personnel<br><i>(Personnel Benefits will auto-calculate in Fibi)</i> |
| Graduate student(s)                                                                              | Fixed to 100%                                                                                                                                                                        | 100% In-kind                  | Personnel                                                            |
| Materials/Supplies/Consumables                                                                   | Subject to <a href="#">Procurement deadlines and purchasing thresholds</a>                                                                                                           | Direct cost                   | Operational Expenses                                                 |
| Minor equipment                                                                                  | <i>Under AED 5k unit cost (otherwise is unallowable CAPEX*)</i>                                                                                                                      | Direct Cost                   | Operational Expenses                                                 |
| Laboratory use fees; machine time; fee-for-service contracts                                     | Subject to <a href="#">Procurement deadlines and purchasing thresholds</a>                                                                                                           | Direct Cost                   | Technical Consulting                                                 |
| Research Visitors – ALL costs, incl: per diem, accommodations, visas, medical insurance, airfare | Per <a href="#">Research Visitor Guidelines (Estimate Research Visitor Costs)</a>                                                                                                    | Direct Cost                   | Technical Consulting                                                 |
| Conferences; KU personnel travel                                                                 | Max. <b>AED 50k</b> per fiscal period (Jan-Dec), subject to <a href="#">KU Duty Travel Policy (Estimate Travel Costs)</a>                                                            | Direct Cost                   | Travel                                                               |
| Research Field Work                                                                              | <i>Case-by-case consideration</i>                                                                                                                                                    | Direct Cost                   | Travel                                                               |
| Publication Fees / Open Access                                                                   | Q1 journals only (for cases where KU Library tokens cannot be availed.)                                                                                                              | Direct Cost                   | Other Direct Cost                                                    |
| Funded External Collaborators                                                                    | Up to 30% of project's Total Requested Budget per fiscal period;<br>Min. 25% in-kind contribution committed by External Collaborator                                                 | Direct Cost                   | Subcontracts                                                         |

\*CAPEX is not an eligible budget category. CAPEX is defined by [KU Fixed Asset Policy \(KUP 6500\)](#)

## 7. AWARD ADMINISTRATION

USR is responsible for monitoring the progress of RIG and RIG-S awards, providing compliance oversight, and facilitating the sound stewardship of internal funding.

**7.1. Progress Reports** are to be submitted Annually. Progress Reports shall be submitted within thirty (30) days following the end of each reporting period, using the reporting template provided by USR.

**7.2. Final Reports** at the end of the Award Term, Final Reports (e.g., Technical, Financial and Intellectual Property) must be submitted to USR within sixty (60) days following the expiration of the applicable term.

**7.3. Additional Reporting Requirements** USR reserves the right to request additional ad hoc reports to ensure performance of the Award, verify compliance with Award terms and conditions and as may be required for official institutional reporting purposes.

**7.4. Fiscal Year Budget Basis** Internal funding awards operate on the KU Fiscal Year budget basis, regardless of start date. Unutilized funds remaining at the end of each fiscal period (Jan-Dec) will not be carried forward. **Pls must be aware of the applicable KU deadlines, particular those related to Purchasing & Contracts, to plan accordingly for expending budget within the fiscal year allocated.**

## 8. LIST OF SUPPORTING DOCUMENTS & TEMPLATES

### Stage 1: Expression of Interest

- a. RIG-2024 EOI Template (mandatory attachment)

*EOI supporting documents and templates will be attached to EOI Grant Call.*

### Stage 2: Full Proposal

- b. RIG-2024 Full Proposal Template (*mandatory attachment*)
- c. RIG-2024 Proposal Review Criteria (*for reference only*)
- d. Letter of Commitment (LOC) Template (*mandatory attachment per external entity, if sub-award to be issued*)
- e. Letter of Support (LOS) (*no template; optional attachment*)
- f. Ethics Approvals (*optional attachment/s*)

*Full proposal supporting documents and templates will be sent to shortlisted proposal PI's, following the EOI stage; and attached to Full Proposal Grant Call.*

Note all applications must be completed in the corresponding RIG-2024 templates. EOIs and FPs completed in templates from prior cycle CIRAs or RIG-2023 , or any other templates, will not be eligible to proceed to the corresponding review stage.

## END OF GRANT CALL DOCUMENT
